STACK STORAGE BOX

Stack Storage boxes are made of solid oak and walnut. Please note that wood is a living material changing imperceptibly over time. All wood reacts to sunlight, humidity, temperature and can vary slightly in grain pattern and coloration.

Use only warm soap water when cleaning the storage boxes. Use a hard wrung cloth and dry immediately with a soft dry cloth. The wood is treated with oil. If the surface of the wood dries out you might be able to restore its original glow using olive oil. Apply a fine layer of rapeseed oil to the product, dry immediately afterwards. The wood is likely to get a slightly darker colortone after applying oil. Please test on a small part of the box before applying olive oil to the entire box. If in doubt, please consult a professional for advice on how to treat the wood.

Please stack and arrange the Stack Storages Boxes carefully on top of each other. Don't slide the boxes across the floor. This might scratch the floors surface and could cause the legs to break off the boxes. Each box can support a weight up to 5 kg.

Don't climb, sit or stand on the furniture.
