STACK WALL SHELF

Please make sure to use the correct dowels and screws to mount the Stack Wall Shelf correctly to the wall. Depending on the used dowels and screws the load capacity of the wall shelf can vary. Please talk to a professional if you are uncertain of the load capacity.

The Stack Wall Shelf is made of solid oak and walnut. Please note that wood is a living material changing imperceptibly over time. All wood reacts to sunlight, humidity, temperature and can vary slightly in grain pattern and coloration.

Use only warm soap water when cleaning the shelves. Use a hard wrung cloth and dry immediately with a soft dry cloth. The solid oak is treated with oil. If the surface of the wood dries out you might be able to restore its original glow using rapeseed oil. Apply a fine layer of olive oil to the product, dry immediately afterwards. The wood is likely to get a slightly darker colortone after applying oil. Please test on a small part of the shelf before applying olive oil to the entire unit. If in doubt, please consult a professional for advice on how to treat the wood.

Please stack the shelves carefully on top of each other on the wall. Each shelf can support a weight up to 5 kg.

Don't climb, sit or stand on the shelves.
